

# Advanced Control Formulary<sup>®</sup>

The **CVS Caremark® Advanced Control Formulary®** is a guide within select therapeutic categories for clients, plan members and health care providers. **Generics should be considered the first line of prescribing.** If there is no generic available, there may be more than one brand-name medicine to treat a condition. These preferred brand-name medicines are listed to help identify products that are clinically appropriate and cost-effective. Generics listed in therapeutic categories are for representational purposes only. This is not an all-inclusive list and does not guarantee coverage. This list represents brand products in CAPS, branded generics in upper- and lowercase *Italics*, and generic products in lowercase *italics*.

## PLAN MEMBER

Your benefit plan provides you with prescription drug coverage that is administered by CVS Caremark. Ask your doctor to consider prescribing, when medically appropriate, a preferred medicine from this list. Take this list the next time you or a covered family member sees a doctor.

- Your specific prescription benefit plan design may not cover certain medications, products or categories, regardless of their appearance in this document. Medications and products recently approved by the U.S. Food and Drug Administration (FDA) may not be covered immediately upon release to the market.
- Your prescription benefit plan design may alter coverage of certain products or vary cost sharing amounts based on the condition being treated.
- You may be responsible for the full cost of medications and products that are removed from coverage.
- For specific information regarding your prescription benefit coverage and cost sharing, or if you have additional questions, please sign in or register on [Caremark.com](#) and click Plan Summary on the Plan & Benefits menu.
- When a generic medication that is equivalent to a brand-name drug is released to the market, in most instances, that brand-name drug will be designated as a non-preferred option.

## HEALTH CARE PROVIDER

Your patient is covered under a prescription benefit plan administered by CVS Caremark. As a way to help manage health care costs, authorize generic substitution whenever possible. If you believe a brand-name product is medically necessary, consider prescribing a brand name on this list.

- The member's prescription benefit plan design may alter coverage of certain products or vary cost sharing amounts based on the condition being treated.
- This drug list represents a summary of prescription coverage. The member's specific prescription benefit plan design may not cover certain products or categories, regardless of their appearance in this document. Products recently approved by the FDA may not be covered immediately upon release to the market.
- The member's prescription benefit plan may have different cost sharing for specific products on the list.
- Unless specifically indicated, drug list products will include all dosage forms.

- Log in to [Caremark.com](http://Caremark.com) to check coverage and cost sharing information for a specific medicine.

**FOR YOUR INFORMATION:** New-to-market products and new variations of products already in the marketplace will not be added to the formulary immediately. Each product will be evaluated for clinical appropriateness and cost-effectiveness. Recommended additions to the formulary will be presented to the CVS Caremark National Pharmacy and Therapeutics Committee (or other appropriate reviewing body) for review and approval. Listed products may be available generically in certain strengths or dosage forms. Dosage forms on this list will be consistent with the category and use where listed.

Drug products are identified by unique numerical product identifiers, called National Drug Codes (NDC), which identify the manufacturer, strength, dosage form, formulation and package size.

Some listings do not include certain NDCs as noted above.

For VOSEVI listing above: For use in patients previously treated with an HCV regimen containing an NS5A inhibitor (for genotypes 1-6) or sofosbuvir without an NS5A inhibitor (for genotypes 1a or 3).

An ACCU-CHEK blood glucose meter may be provided at no charge by the manufacturer to those individuals currently using a meter other than ACCU-CHEK. For more information on how to obtain a blood glucose meter, call: 1-877-418-4746.

BD ULTRAFINE syringes and needles are the only preferred options.

ACCU-CHEK brand test strips, lancets and lancing devices are the only preferred options.

For HYRIMOZ listing above: Sandoz manufactured NDCs (61314-XXXX-XX) are excluded. Cordavis manufactured NDCs are preferred.

Generic multivitamins (except Activite, Dexifol, HylaVite, Multipro, TronVite, Vitasure) are the only preferred options.

Generic prenatal vitamins are the only preferred options.

An exception process is in place for specific clinical or regulatory circumstances that may require coverage of an excluded medication. For more information, please sign in or register on Caremark.com and click Plan Summary on the Plan & Benefits menu.
