

Blue View Vision pop-up clinic

Take care of your eye health without leaving work

Our pop-up clinic, offered as part of your Anthem vision benefits, brings an eye doctor's office and an eyewear store directly to your workplace. You can conveniently use your Blue View Vision benefits at work, saving you time while you take care of your health.

Blue View Vision's pop-up clinic offers:

A comprehensive eye exam

Receive a 15- to 20-minute exam from a local optometrist who uses the latest in optic technology. Regular eye exams are important because they help detect changes in your vision. They also help detect early signs of chronic conditions such as diabetes and high blood pressure.

A large selection of eyewear

Shop hundreds of top brand eyeglass frames and many choices for contact lenses.

Other vision perks

- Free delivery of eyeglasses or contact lenses to your home or workplace.
- Additional vision discounts, including savings on lens options and upgrades.
