

Making Wellness Affordable

# Preferred Drug List: Drexii Base Formulary

**This document contains an abbreviated list of medications that are covered under your prescription drug plan as long as the medication is medically necessary and adheres to plan rules.**

Please note that the list is subject to change.

**Next to each drug name, you may notice one or more of the following indicators:**

**PA** — Denotes that the medication may require prior authorization. Your healthcare provider will need to submit additional documentation to Drexii and obtain approval prior to coverage.

**ST** — Indicates that there is a step therapy requirement. This means that you may be asked to try one or more medications before the requested medication is covered.

**SP** — Denotes that the medication is a specialty medicine. Specialty medicines are typically high-cost medicines that can often only be obtained at a specialty pharmacy. Specialty drug coverage may differ based on the plan.

**ACA** — Indicates that a medication is included under the Affordable Care Act and may be covered for \$0 as a preventative medication. Examples of preventative medications include: tobacco cessation, certain immunizations, bowel-preparation medications, and contraceptives. You must have a valid prescription from your health care provider and fill the medication at an in-network pharmacy. This list may change over time and restrictions may apply.

Note: To obtain a prior authorization form, please visit [Drexii.com](https://www.drexii.com) and locate the form under the 'Forms' tab.

This document can be faxed by your doctor to 480-444-1449.

You may also contact our Help Desk at 844-728-3479 if you require additional assistance.
