

What is "well-being"?

Well-being is the state of being healthy, comfortable, and happy.

Well-being is good physical health, having positive emotions, managing negative emotions, social interaction, freedom from pain, and living your healthiest possible life no matter your age or situation.

HMSA believes that well-being can be an actively pursued and attainable goal. We are committed to helping our members achieve their own sense of well-being through a wide range of programs and resources.
